

February 8, 2018

Hey Mr. Tran,

I wanted to write this to let you know of my experience at II-VI Optical Systems.

First, let me say this is a great opportunity and thank you for notifying me about it. The knowledge I learned ever since coming here has been tremendous. I have been learning skills and abilities that I will actually be able to use in my future. I get to play around with software with a twist of optics and engineering. I cannot describe in words how polite and educated the employees are here. They have showed me nothing but respect and companionship. Some of the workers here have taken me under their arms and mentored me to learn things I cannot learn anywhere else. Most importantly, this opportunity gives me the crucial experience of working in an organized and prestigious company that usually cannot be gained at a typical 17 year old minimum wage job. I have learned important soft skills and the ability to interact and conduct my self in a professional environment.

Fortunately, I still work here at II-VI Optical Systems after school; and overall, the experience has been nothing but wonderful and rewarding.

Thank You,
Abdulla Khalid
